4. Purpose of the policy

Conflicts of Interest are inherent in many aspects of the business of AIM. They are not prohibited.

The purpose of this Conflicts of Interest Policy (the “Policy”) is to provide the minimum standards for dealing with actual and potential Conflicts of Interest.

Conflicts of Interest must:

- Firstly, be identified and;
- Secondly, either be:
 - Avoided where possible (i.e. prevented) or;
 - Managed, monitored and, where required, disclosed to investors.

This Policy lays down the procedures to be followed and measures to be adopted in order to identify, prevent or manage, monitor and, where required, disclose Conflicts of Interest to investors and other Clients.

The Policy covers the activities of collective portfolio management carried out by or on behalf of AIM (including activities carried out by a delegate, sub-delegate, external valuer or counterparty) and the activities of discretionary portfolio management and investment advice.

The Policy aims to ensure that:

- AIM **identifies** circumstances which constitute or may give rise to a Conflict of Interest, *inter alia*:
 - Conflicts of Interest arising for the role of a “relevant person” inside the Company and, at the same time, in another related entity which may have an opposite interest compared to the Company;
 - Conflicts of Interest arising from any contract with third parties in which a relevant person has an economic or personal interest, which may be in opposition with Company interest;
 - Conflicts of Interest arising for a Company as being part of a group which interest can be opposite to the interest of the company.

- Records are maintained to **monitor** actual and potential Conflicts of Interest and how they are managed;
- Where organisational arrangements made by AIM to identify, prevent or manage and monitor conflicts of interest are not sufficient to ensure, with reasonable confidence, that risks of damage to investors' interest will be prevented, the AIM clearly **discloses** the general nature or sources of conflicts of interest to the investors before undertaking business on their behalf, and develops appropriate policies and procedures.

5. Regulatory framework

The applicable Laws and Regulations in the context of Conflicts of Interest include:

The Compliance Function assesses the AIM's compliance with the Legal and Regulatory requirements on Conflicts of Interest and reports to the Conducting Officer responsible for Conflicts of Interest and, where relevant, the Board.

7. Identification of Conflicts of Interest

A Conflict of Interest is likely to arise if AIM, a Relevant Person or a person directly or indirectly linked to AIM by way of control finds itself in one or more of the following situations, whether as a result of providing services or otherwise:

- AIM or that person is likely to make a financial gain, or avoid a financial loss, at the expense of the Fund or its investors or another Client;
- AIM or that person has an interest in the outcome of a service or an activity provided to the Fund or its investors or to another Client or of a transaction carried out on behalf of the Fund or another Client, which is distinct from the Fund's or the other Client's interest in that outcome;
- AIM or that person has a financial or other incentive to favour:
 - The interest of one Fund or other Client over another Fund, another Client or group of Clients;
 - The interest of one investor over the interest of another investor or group of investors in the same Fund;
- AIM or that person carries out the same activities for one Fund or other Client as for one or several other Funds or other Clients;
- AIM or that person receives or will receive from a person other than the Fund or its investors or other Client an inducement in relation to the collective and discretionary portfolio management activities or other activities provided to the Fund or other Client, in the form of monies, goods or services, other than the acceptable commission or fee for that service.

AIM identifies Conflicts of Interest that may arise in the course of its business activities:

- Between AIM, including its Board, Conducting Officers, employees or any person directly or indirectly linked to AIM itself by control, and the Funds managed by AIM or the investors in that Fund or any Client;
- Between the Fund or the investors in that Fund, and another Fund or the investors in that Fund;
- Between the Fund or the investors in that Fund, and another Client of AIM;
- Between two Clients of AIM;
- Between an AIM delegate or other service provider and AIM itself, its Board, Conducting Officers, employees, any person directly or indirectly linked to the AIM itself by control, a Fund it manages or another Client.

A Conflict of Interest may arise in a variety of situations. Some of the areas of concern could include, but are not limited to:

- Personal account dealing;
- Provision of professional advice by a Relevant Person that may be in favour of his own interest;
- Inducements/gifts/entertainment;
- Remuneration incentives such as performance related fees;
- Potential misuse of confidential information;
- Outside business activities of Relevant Persons.

AIM ensures that Conflicts of Interest declarations are made by:

- Members of the Board at each Board meeting;
- Members of Senior Management at each Board meeting.

8. Preventing and Managing Conflicts of Interest

AIM ensures that systems, controls and procedures are adequate to identify, prevent or manage, monitor and, where required, disclose Conflicts of Interest that may arise in the course of its business activities.

The procedures and measures established for the prevention or management of Conflicts of Interest are designed to ensure that the relevant persons engaged in different business activities involving a risk of Conflict of Interest carry out these activities and have a degree of independence which is appropriate to the size and activities of the AIM and of the group to which it belongs, and to the materiality of the risk of damage to the interest of the Fund or its investors or other Clients.

This includes, *inter alia*:

- Implementing effective procedures to prevent or control the exchange of information between Relevant Persons engaged in collective and discretionary portfolio management activities or

- other activities involving a risk of Conflict of Interest where the exchange of information may harm the interest of one or more Funds or their investors or other Clients(e.g. Chinese walls);
- Separate supervision of Relevant Persons, whose principal functions involve carrying out collective and discretionary portfolio management activities on behalf of, or providing services to, clients or investors, whose interest may conflict, or who otherwise represent different interest that may conflict, including those of the AIM;
 - Implementing specific safeguards against Conflicts of Interest to allow for the independent performance of control functions (risk management, compliance and internal audit) and valuation;
 - Measures to avoid Conflicts of Interest in the remuneration policy including the removal of any direct link between the remuneration of Relevant Persons principally engaged in one activity and the remuneration of, or revenues generated by, different Relevant Persons principally engaged in another activity, where a Conflict of Interest may arise in relation to those activities (e.g. Board, Senior Management, where relevant, and internal control functions should not be remunerated on the basis of performance of Funds or other Client mandates);
 - Measures to prevent or restrain any person from exercising inappropriate influence over the way in which a Relevant Person carries out collective and discretionary portfolio management or other activities (e.g. ensuring that a conflicted person does not participate in investment management decisions);
 - Measures to prevent or control the simultaneous or sequential involvement of a Relevant Person in separate collective and discretionary portfolio management activities or other activities where such involvement may impair the proper management of Conflicts of Interest (e.g. segregating the investment management of different Funds and/or other Client mandates).

In relation to delegates and service providers, the specific measures implemented include the following:

- For each Fund managed by AIM a depositary is appointed. AIM does not act as depositary;
- AIM does not delegate portfolio management or risk management to the depositary or a delegate of the depositary;
- AIM does not delegate portfolio management or risk management to any entity whose interest may conflict with those of the AIM or the investors of the Fund, unless such entity has

functionally and hierarchically separated the performance of its portfolio management or risk management tasks from its other potentially conflicting tasks, and the potential Conflicts of Interest are properly identified, managed, monitored and disclosed to the investors of the Fund;

- A prime broker acting as counterparty to a Fund does not act as depositary for that Fund ,unless it has functionally and hierarchically separated the performance of its depositary functions from its tasks as prime broker and the potential Conflicts of Interest are properly identified, managed, monitored and disclosed to the investors of the Fund;
- Where the depositary is appointed for a Fund as external valuer of that Fund, AIM ensures that depositary functionally and hierarchically separated the performance of its depositary functions from its tasks as external valuer and the potential conflicts of interest are properly identified, managed, monitored and disclosed to the investors of the Fund.

Where the adoption or the application of one or more of these measures and procedures does not ensure the requisite degree of independence, AIM adopts alternative or additional measures and procedures as are necessary and appropriate for those purposes.

Where the organisational or administrative arrangements made by AIM are not sufficient to ensure, with reasonable confidence, that risks of damage to the interest of the Funds or investors in the Funds or other Clients are prevented, the Senior Management is promptly informed in order to take any necessary decision or action to ensure that AIM acts in the best interest of the Funds or investors in the Funds or other Clients.

The Relevant Persons, while participating in decision-making processes relating to Company investments, shall refrain from suggesting and performing personal transactions. Relevant Persons shall have the responsibility to inform the Conducting Officer responsible of personal investments which may be “price sensitive”. This sensitiveness has to be assessed based on the impact of the Company transactions on the price of the investments in question.

9. Monitoring Conflicts of Interest

AIM maintains and regularly updates a record of the types of activities undertaken by or on behalf of the AIM in which a Conflict of Interest entailing a material risk of damage to the interest of one or more Funds or its investors or other clients has arisen or, in the case of an ongoing activity, may arise.

The record is kept in the form of a Conflicts of Interest Register (the “COI Register”), which documents any identified potential and actual Conflicts of Interest, the measures taken to prevent or mitigate the conflict, information on its disclosure, if any, and the estimated level of risk of damage to the interest of one or more Funds or its investors or other clients.

The COI Register must be updated regularly. It is updated when any new significant Conflicts of Interest arise, and at least on an annual basis.

The Compliance Officer is responsible for maintaining the COI Register, following the instructions given by the Board.

Access to the COI Register may be restricted. In any case, all of the Members of Senior Management, the Compliance Function and the Internal Audit Function must have access to the register.

The Board must receive on a regular basis, and at least annually, written reports by the compliance officer or Conducting Officers on identified Conflicts of Interest. The written report takes the form

of the COI Register and the summary on Conflicts of Interest in the annual Compliance Report.

The COI Register is submitted annually for review and approval to the Board.

a. Internal disclosure by Board Members, Conducting Officers, employees
